

Real-time PCR pathogen detection

Powered by GENE-UP® for fast, reliable detection of food-borne pathogens

Are you using the best method for your pathogen screening?

PCR-based methods offer a faster alternative to traditional microbiology testing, but not all PCR methods are created equal. AsureQuality's pathogen screening delivers maximum benefits for speed, reliability and international acceptance.

AsureQuality Advantage

We deliver fast, accurate pathogen screening for product and environmental samples with results available in just one day. Our accredited laboratories combine our globally recognised expertise with GENE-UP® PCR technology from bioMérieux and confirmation using Bruker Mass Spec MALDI-TOF, giving you results that are:

Fast

Accurate screen results in one day for *Salmonella*, *Listeria* and *Cronobacter*. Next-day confirmation is possible following a positive screen test.

Reliable

Market-leading low false positive rate for screen testing, reducing the need for confirmation testing.

Recognised

IANZ accredited under the MPI Recognised Laboratory Programme for export market access. Validated to AFNOR, AOAC and ISO standards.

Internationally accepted

Wide acceptance from multinational buyers.

Real-time PCR pathogen detection

Powered by GENE-UP® for fast, reliable
detection of food-borne pathogens

What This Means For You

Release products
faster

Reduce unnecessary delays
and costs due to false positive
screen results

Comply with local and
overseas regulatory
requirements

Meet international customer
standards

Protect consumers and your
brand

Access expert advice, not just
a test result

The AsureQuality Commitment

Proven technology

GENE-UP® dual detection system (FRET + melt curve analysis) delivers specificity and one of the lowest false positive rates in the market.

Extra assurance

Our laboratory processes are unique for handling the release of critical results.

Expert support

Advice on contamination management and root cause analysis from our technical team. Trusted information about lab services and personal support via our Customer Care Centre.

Real-time visibility

Register samples, track test progress and view individual test results as soon as they are available via our LabConnect portal.
