

## Acceptable Livestock Health Products – USDA NOP

- This list includes products that may be used by organic livestock producers certified to regulated export markets, including the USDA National Organic Program (NOP).
- All products must be included in the Organic Management Plan and approved by AsureQuality **BEFORE** use.
- For emergency treatments the listing in the Organic Management Plan is a contingency plan, so notification of use is required using an Emergency Treatment form.
- ACVM products can be viewed at <https://eatsafe.nzfsa.govt.nz/web/public/acvm-register> by entering in the applicable ACVM registration number listed below.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Local Anaesthetic	A005419	<b>Lopaine 2%</b>	Lignocaine/ Lidocaine	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Use requires a withholding period of 90 days after administering to livestock intended for slaughter, and 7 days milk withholding for dairy stock. Records of use must be maintained for five years as per USDA NOP requirements.
Local Anaesthetic	A006597	<b>Nopaine 2%</b>	Lignocaine/ Lidocaine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Use requires a withholding period of 90 days after administering to livestock intended for slaughter, and 7 days milk withholding for dairy stock. Records of use must be maintained for five years as per USDA NOP requirements.
Local Anaesthetic	A006498	<b>Bomacaine</b>	Lignocaine/ Lidocaine	Bayer NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Use requires a withholding period of 90 days after administering to livestock intended for slaughter, and 7 days milk withholding for dairy stock. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A005541	<b>Phoenix Xylazine 2% Injection</b>	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A006540	<b>Phoenix Xylazine 5% Injection</b>	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Sedative / Analgesic	A006583	<b>Phoenix Xylazine 10% Injection</b>	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A007422	<b>Anased 2% Injection</b>	Xylazine	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A007421	<b>Anased 10% Injection (deer)</b>	Xylazine	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Xylazine reversant	A006810	<b>Tolazine Injection</b>	Tolazoline	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: For use only to reverse the effects of sedation and analgesia caused by Xylazine. Use requires a withholding period of at least 8 days after administering to livestock intended for slaughter, and at least 4 days milk withholding for dairy stock. Records of use must be maintained for five years as per USDA NOP requirements.
Anti-inflammatory	A007861	<b>Flunixin Injection</b>	Flunixin	Norbrook NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Withholding period at least twice the time stated on drug label. Records of use must be maintained for five years as per USDA NOP requirements.
Antimicrobial	A004002	<b>Iodine Tincture Spray</b>	Iodine	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial	A003320	<b>Vetadine PVP Iodine Spray</b>	Iodine	Bayer NZ Ltd	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial	N/A	<b>FIL Stock Iodine 2.5%</b>	Iodine	FIL NZ	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
						requirements.
Antimicrobial/ Teat Sanitiser	A009355	<b>DeLaval Spray &amp; Dip RTU</b>	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A009057	<b>KontACT RTU Advanced</b>	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A007271	<b>KontACT (Concentrate)</b>	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A003617	<b>Teat Guard 2</b>	Iodine	Ecolab NZ	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A011222	<b>Hibitane2</b>	Glycerine, chlorhexidine	Ecolab NZ	Restricted	RESTRICTED: For use as a teat sanitiser when alternative germicidal agents and/or physical barriers have lost their effectiveness. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Teat conditioner	N/A	<b>Shine (Elthamol) Glycerine</b>	Glycerine	Bell-Booth Ltd	Restricted	RESTRICTED: For use as an external teat dip. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Udder conditioner	N/A	<b>Udder Comfort - Yellow Spray</b>	Essential oils	Shoof International Ltd	Restricted	RESTRICTED: For use as an external udder treatment on the basis that it is a natural product. Records of purchase and use must be maintained for five years as per USDA NOP requirements. NB: other forms of Udder Comfort are not approved.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Udder conditioner	N/A	<b>Udder Treat-Mint</b>	Essential oils	Wharfb Ltd	Restricted	RESTRICTED: For use as an external udder treatment on the basis that it is a natural product. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Bloat treatment	A003375	<b>Bloatenz 2 in 1</b>	Poloxalene	Ecolab NZ	Restricted	RESTRICTED: For emergency treatment of bloat only. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Endoparasiticide	A007392	<b>Ivomec Injection for cattle, sheep and pigs</b>	Ivermectin	Merial NZ Ltd	Restricted  <b>Prohibited in slaughter stock</b>	<b>From 27<sup>th</sup> December 2019 this product will be PROHIBITED for USDA NOP.</b>  RESTRICTED: For emergency treatment of dairy and breeder stock only, <b>prohibited in slaughter stock</b> . Milk or milk products from a treated animal must not be sold as organic for 90 days after product use. In breeder stock, treatment cannot occur during the last third of gestation if the progeny is to be sold as organic and must not be used during the lactation period for breeder stock. Approval is subject to evidence of a problem (e.g. faecal egg count) or vet recommendation. Number of treatments and records as per AQ Standard. Notify use by submitting completed Emergency Treatment form.
Endoparasiticide	A008032	<b>Noromectin Pour-On for Cattle and Deer</b>	Ivermectin	Norbrook NZ Ltd	Restricted  <b>Prohibited in slaughter stock</b>	<b>From 27<sup>th</sup> December 2019 this product will be PROHIBITED for USDA NOP.</b>  RESTRICTED: For emergency treatment of dairy and breeder stock only, <b>prohibited in slaughter stock</b> . Milk or milk products from a treated animal must not be sold as organic for 90 days after product use. In breeder stock, treatment cannot occur during the last third of gestation if the progeny is to be sold as organic and must not be used during the lactation period for breeder stock. Approval is subject to evidence of a problem (e.g. faecal egg count) or vet recommendation. Records of purchase and use must be maintained for five years as per USDA NOP requirements. Notify use by submitting completed Emergency Treatment form.

Electrolyte - Injectable	A011060	<b>Metaboost CBG</b> (formerly Calject CBG)	Calcium gluconate	Sykes Vet International Pty Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A011058	<b>Bluecross CBG</b> (formerly Vetcal)	Calcium gluconate	Sykes Vet International Pty Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A004633	<b>C.B.G. 37.5</b>	Calcium borogluconate	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A004047	<b>Glucalmag</b>	Calcium borogluconate, Magnesium chloride	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001441	<b>Glucalmax</b>	Calcium borogluconate, Glucose, Magnesium chloride	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001442	<b>Glucalphos</b>	Calcium borogluconate, Glucose, Magnesium hypophosphite	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A004047	<b>Calpro 375</b>	Calcium borogluconate, Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A007111	<b>Calpromag</b>	Calcium borogluconate, Magnesium chloride, Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Electrolyte - Injectable	A009674	<b>Dextron</b>	Glucose	Landmark Operations (NZ) Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A009719	<b>VetDEX</b>	Glucose	Landmark Operations (NZ) Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001450	<b>Dextrose 40%</b>	Dextrose	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001448	<b>Magnesium sulphate 20%</b>	Magnesium sulphate	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A003230	<b>Trolyte</b>	Potassium chloride, Sodium bicarbonate, Disodium hydrogen phosphate, Sodium chloride	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A001625	<b>Dexolyte</b>	Dextrose, Sodium chloride, Potassium chloride, Vitamin A	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A009642	<b>Oral Max</b>	Magnesium chloride, Calcium chloride, Propylene glycol	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A007669	<b>Oral-Cal</b>	Calcium chloride	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Feed additive	N/A	<b>Trubond</b>	Bentonite (montmorillonite)	Sibelco	Restricted	RESTRICTED: For use as a feed additive or to assist treatment of calf scours. Not to exceed 2% of total ration. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Feed additive	N/A	<b>Diatomaceous Earth</b>	Diatomaceous Earth	Probitas Systems NZ Ltd	Restricted	RESTRICTED: For use as a feed additive or to assist treatment of calf scours. Not to exceed 2% of total ration. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Hormone	A007289	<b>Oxytocin V</b>	Oxytocin	Vetpharm (NZ) Ltd	Restricted	RESTRICTED: For use in post parturition treatment, no routine or long term use. Records of use must be maintained for five years as per USDA NOP requirements.
Hormone	A001370	<b>Butocin</b>	Oxytocin	Bayer NZ Ltd	Restricted	RESTRICTED: For use in post parturition treatment, no routine or long term use. Records of use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A005908	<b>Hideject</b>	Vitamin A, D <sub>3</sub> , E	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006357	<b>Vijec Vitamin B12 Injection</b>	Vitamin B12	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007255	<b>Vijec Vitamin B12 2000 Injection with Selenium</b>	Vitamin B12, Sodium selenate	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Nutrient / electrolyte	A002017	<b>Prolaject B12</b>	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A005850	<b>Prolaject B12 1000 for Sheep and Cattle</b>	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006536	<b>Prolaject B12 2000 for Sheep and Cattle</b>	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006170	<b>Prolaject B12 1000 Plus Selenium for Sheep and Cattle</b>	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006903	<b>Prolaject B12 2000 Plus Selenium for Sheep and Cattle</b>	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007397	<b>Cobalject 1000</b>	Vitamin B12	Horizon Agresources	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing

						requirements.
Nutrient / electrolyte	A009885	<b>Elevate B12 1000 Plus Selenium for Sheep and Cattle</b>	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009883	<b>Elevate B12 2000 Plus Selenium for Sheep and Cattle</b>	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007040	<b>Selpor</b>	Sodium selenate	Merial NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006139	<b>Selovin-5</b>	Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A010198	<b>Face-Guard 90-250 kg</b>	Zinc	Bayer NZ Ltd	Restricted	RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Nutrient / electrolyte	A010744	<b>Face-Guard 251-660 kg</b>	Zinc	Bayer NZ Ltd	Restricted	RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009773	<b>Face-Guard Sheep</b>	Zinc	Bayer NZ Ltd		RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009469	<b>Coppermax</b>	Calcium copper edetate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Vaccine	A010856	<b>Startvac</b>	E coli, Staph aureus	Hipra NZ Ltd	Restricted	RESTRICTED: Usage based on prevalence of the disease in the geographical area and unable to be controlled by other management techniques, or due to a regulatory requirement. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Vaccine	A007140	<b>Hiprabovis 3</b>	IBR, Parainfluenza, BVD	Hipra NZ Ltd	Restricted	RESTRICTED: Usage based on prevalence of the disease in the geographical area and unable to be controlled by other management techniques, or due to a regulatory requirement. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
