Sort the order of results by selecting the **Test Name** column.

Search across multiple sample registrations

Access the results search from the dashboard by selecting the **View test results** button.

View test results
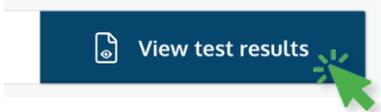

Search filters

To refine the list of results, select from the list of **Search filters**.

Selecting a **Search filter** will display the options for that filter below.

You can include different **Search filters** in a single search.

Add multiple values to a **Search filter** by clicking the ⊕ button

Selecting the Search button will apply the Search filters you have enabled, updating the results table beneath.

You can also access the Results search by clicking View test results in the Menu.

Save a set of common search filters for later use.
Save

Export to CSV
Selecting this allows you to download the results table in Comma Separate Value format. You can download either the current view of columns in the table, or all available columns.
